

Backwards and Opposites

When I make the cards, I put the backwards word in the center of the index card and draw a box around it with a highlighter (I've used labels to mass produce my cards, so this is easy to do). Then, I put the answer on a separate label on the bottom of the reverse side (so that hands also cover it). The labels help the cards from being see-through. Notice that some words overlap between each age range.
