

MATH STOMP!

Math meets movement with this fun game from
poolnoodlesandpixiedust.com

Materials:

Construction paper with math facts written (question on front/answer on back) on them or large flash cards

For two or more players.

How to Play:

1. Space the cards out on the floor
2. Call out a problem
3. Learner jumps to and stomps on the correct answer
4. Place cards with either side facing up and call out the opposite of what is facing up on the card. For example, if 8×2 is face up, call out 16, and vice versa
5. If playing with more than one learner, have them take turns until all problems have been solved
